FACE THE FACTS

Louis DeJoseph, MD is one of the select few surgeons in Atlanta with special training in facial plastic and reconstructive surgery. His patients have voted Dr. DeJoseph or "Dr. D", the **Best Facial Plastic Surgeon in Atlanta by Jezebel Magazine** again for 2019!

His practice, **Premier Image Cosmetic and Laser Surgery**, was Georgia's first cosmetic surgery center to specialize in complete specialty aesthetic plastic surgery for both face and body procedures. Today he's revealing the answers to his patients most frequently asked questions.

MINIMALLY-INVASIVE MAKEOVER for YOUR 30'S

I'm 30 years old and want to get rid of the fat under my chin. What's the best solution?

There are several options, and as I have said before, most every solution in aesthetics works, however it is all about patient selection. The most important thing you can do while searching for a treatment would be to ensure a practice has several different options to provide optimal results for different body and skin types.

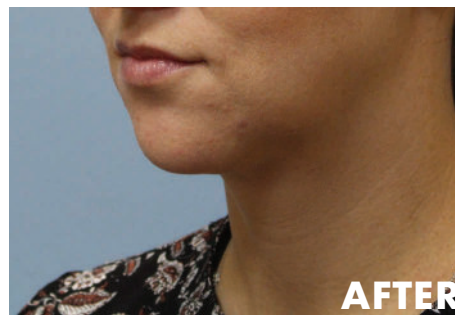

Our practice offers several methods based on a patient's age, build and how the weight is distributed throughout the neck and chin. We offer submental micro-liposuction along with minimally invasive radio frequency heat sculpting (called NeckTite/FaceTite) for best results. Many of our patients will also consider chin implants or facial fillers to help with neck and jawline laxity. The beauty of these procedures is minimal downtime and they are performed in-office under local anesthesia.

I'm thinking of getting a chin implant, but will it feel weird?

When chin implants are inserted you will find they feel very natural and just like your chin. There is a short amount of time you need to allow for swelling to go down after your surgery, however you should find a cleaner more defined chin can take years off your age.

BEFORE

Local Anesthesia

FACE THE FACTS

I've been getting Botox since my early 20's but they seem to wear off quickly now. Are there any other options? This can happen with all brands of toxins. To offer the best patient experience we carry Botox, Dysport, Xeomin and Jeuveau. With patient follow up we can easily switch toxin brands or even just adjust units injected.

I have a big event this weekend. What can I do to prep my skin the night before? Our staff provides two services that help our patients get event-ready. One is the HydraFacial because it will give you plumper, more vibrant skin with no discomfort or downtime. The HydraFacial treatment is great for any skin type and can be modified with serums to address specific concerns you may have about your skin health. Another popular treatment is Botox and facial fillers, however don't schedule your appointment the day before your event. While this is a quick and easy treatment, there may be slight bruising and swelling. We recommend you schedule your appointment 7-10 days in advance as well as hold off on alcohol, supplements, herbs and over the counter medicines that have bruising effects.

What is the best way to address my fine lines?

The treatment should be tailored to compliment a busy lifestyle budget, and time of year. There are a variety of treatments to keep you in your Louboutin's and out on the town in no time, and there are those that can require you to escape from the world for a few days, but hey who doesn't need a vacation.

Procedures such as microdermabrasion, hydrating facials, Dermaplane facials, microneedling/collagen induction therapy and chemical peels are great for patients who require little to no downtime, and they fit in everyone's budget. You can purchase by the treatment however most patient's save big by securing

a package. If you require a more advanced treatment, facial fillers and Botox are a good option, and if downtime is not an issue a RF Pin or fractional CO2 Treatment may be necessary. With summer here the minimally invasive procedures are your best option, and please ladies wear your sunscreen.
