jectables, Ear Surgery, Lip Augmentation, Laser Rejuvenation,  
& the minimally invasive Neck Lift

**Louis DeJoseph, MD** is one of the select few surgeons in Atlanta with special training in facial plastic and reconstructive surgery. His patients have voted Dr. DeJoseph or "Dr. D", the Best Facial Plastic Surgeon in Atlanta by Jezebel Magazine 2018 and 2019.

His practice, Premier Image Cosmetic and Laser Surgery, was Georgia's first cosmetic surgery center to specialize in complete specialty aesthetic plastic surgery for both face and body procedures. He is one of 41 American Academy of Facial Plastic & Reconstructive Surgery Fellowship Directors and hosts the only AAFPRS Fellowship Training Program in the state of Georgia. Here, we reveal the answers to his patients' most frequently asked questions.

Never been to the beautifully designed and state of the art Premier Image? Dr. DeJoseph would like to invite you to be his guest for a complimentary consultation, 770-457-6303.

**My neck is showing signs of age, what do I do?** The answer to this question relies on the elasticity of your neck. Gently pull on the skin around your neck. If it retracts back easily, you may be a candidate for a minimally invasive solution such as our NeckTite, Fractora or liposuction. If the skin hangs and doesn't snap back, you may need something surgical such as a neck lift.

**What is the best way to address my fine lines?** The treatment should be tailored to compliment a busy lifestyle, budget, and time of year. There are a variety of treatments to keep you in your Louboutin's and out on the town in no time, and there are those that can require you to escape from the world for a few days, but hey who doesn't need a vacation.

Procedures such as microdermabrasion, hydrating facials, dermaplaning, microneedling/collagen induction therapy and chemical peels are great for patients who require little to no downtime, and they fit in everyone's budget. You can purchase by the treatment however most patients save big by securing a package. If you require a more advanced treatment, facial fillers and Botox are a good option. If downtime isn't an issue, an RF microneedle or fractional CO2 Treatment may be necessary.

With summer here, the minimally invasive procedures are your best option. And ladies, please wear your sunscreen.

**What's your most requested treatment before a big event?** Our staff provides a range of services that help our patients get event-ready. One is the HydraFacial because it will give you plumper, more vibrant skin with no discomfort or downtime. The HydraFacial treatment is great for any skin type and can be modified with serums to address specific concerns you may have about your skin health.

Another popular treatment is Botox and facial fillers, however don't schedule your appointment the day of your event. While this is a quick and easy treatment, there may be slight bruising and swelling. We recommend you schedule your appointment 7-10 days in advance as well as hold off on alcohol, supplements, herbs and over the counter medicines that have bruising effects.

# FACE THE FACTS

## QT Mini Facelift

**What are the benefits of a QT Mini Facelift?** The QT Mini Lift is unique in that it offers many of the benefits of a full facelift with little downtime and less bruising and swelling. The QT Lift addresses the face and jawline using minimal incisions. The incision is hidden in the hairline and inside the ear so it is ponytail friendly. For individuals who wish for a more defined jawline, the procedure may be paired with a QT Neck Lift for optimal results.

**How long does it take to recover from a QT Mini Lift?** Because smaller and fewer incisions are made, bruising and swelling are greatly reduced. Most patients return to work and social functions in as little as eight days.

**How long will my results last?**

Your desired results can last 7-10 years or more.
