

# The Non-Surgical Butt Lift

The Newest Plastic Surgery Trend with No Downtime

**Kristin Boehm, MD**

**Double Board Certified, FACS**

The Non-Surgical Butt Lift, performed by double board-certified body surgeon, Dr. Kristin Boehm, is an injectable procedure that requires zero downtime!

It's recommended for patients who want to increase the volume and roundness of their backside without undergoing surgery. Many patients see a significant lift of the buttocks after one or two injectable treatments.

The Non-Surgical Butt Lift is ideal for the patient who is looking to make their silhouette look more youthful and contoured without undergoing surgery. By rejuvenating a backside that's lost its shape and volume, you can achieve a better fitting wardrobe with natural, well-proportioned curves.

A consultation is complimentary! Schedule yours today at the new Premier Image office in Sandy Springs by calling 770-457-6303.
