

# Louis DeJoseph, MD

PREMIER IMAGE COSMETIC & LASER SURGERY  
OWNER & TRIPLE BOARD-CERTIFIED  
FACIAL PLASTIC SURGEON

For Dr. Louis DeJoseph—a triple board-certified facial plastic surgeon leading the charge at Sandy Springs' esteemed Premier Image Cosmetic & Laser Surgery—a career in medicine was the only path he ever strived for since the early days when his dad, a well-known cardiologist in the town of Hazelton, Penn., would take him along for rounds at his practice. Just like that, Dr. DeJoseph's fate was sealed—and there's no denying it was the perfect move for him. Plastic surgery, in particular, caught his eye early on. "I was amazed by the ability to take a patient and enhance them back to a better vision of themselves," he explains. "It is rewarding each day to watch people shine when they have the self-confidence to do so."

Dr. DeJoseph has received many accolades for his surgical skill, including having the honor to be a fellowship director for the American Academy of Facial Plastic & Reconstructive Surgery, which provides him the opportunity to train and mentor other facial plastic surgeons who share the same passion. Alongside his colleague, Dr. Paul Daraei—a double board-certified facial plastic surgeon who chairs the rhinoplasty and hair transplant department at Premier Image—DeJoseph is proud of their team, saying, "Just as it is rewarding to help a patient reach their aesthetic goals, it is also amazing to match employees, providers and surgeons to their passions, talents and core competencies."

His greatest accomplishment, though? "As a business owner, I believe it was the moment I realized the magnitude of the responsibility I have to my employees and their families. We were fortunate to keep all our employees through the pandemic. We worked hard to re-tool the office to help with childcare, and other COVID-19 related casualties our employees and our community experienced." Next up for Premier Image and Dr. DeJoseph is the addition of a body plastic surgeon to the team to lead a new department in 2022/2023, plus, DeJoseph adds, "We have a beautiful state of the art 6,500-square-foot facility and 3,500-square-foot additional left to expand. Until that time, we will continue to educate, train and develop our team to ensure they are exceeding our patient's expectations."
